Hello Ms. Jurries,

The Off-Site Rule, 40 CFR § 300.440, requires that CERCLA wastes (hazardous substances, pollutants, or contaminants as defined under CERCLA sections 101(14) and (33)) may only be placed in a facility operating in compliance with the Resource Conservation and Recovery Act or other applicable Federal or State requirements.

With this email I am writing to ask about the following facility:

Valley Waste Disposal
29261 US Highway 95
Lewiston, ID 83501

A CERCLA cleanup project has proposed Valley Waste Disposal as a potential receiving facility. Because the waste that would go to the landfill will be CERCLA waste, we need to check to determine the status of the facility under the Off-Site Rule and one step in that process is consulting with permitting agencies. I am contacting you today because I understand that Valley Waste Disposal's operating plan is approved by Idaho Public Health. Has Public Health identified any violations, uncontrolled releases, or other issues that may impact the ability of Valley Waste Disposal to receive CERCLA waste? If so, please provide a brief summary of the issues.

Thank you.
